Hi Roger

Please see below a summary of camp capital expenditure for the period 2019 to 2023. There is a further £500k projects still in plan for this year which includes continuation of WiMax replacement and Rural Radio Backhaul.

There was an increase in Capacity in October 2023 with further significant increases planned for this year, over the next few months.

With regards to the Low Latency packages, we have some businesses ready to start trials once we are ready to cutover. Testing is still ongoing as we had some technical challenges but we hope this is coming to an end soon and we should be ready. We hope to add in further businesses and services as we go along with the trials.

Regards  
Roma
